Luxury is Personal

Manufactured in Rajkot

# ABOUT US

## SMART HOME AUTOMATION

**Made in India**

**1000+ Superhomes**

**100 million+ customizations**

**7-year guarantee**

**Customized Solutions**

G6 Superhomes was born in 2020 out of a passion for bringing premium, affordable smart home solutions to life. When our founder, Sarvam, set out to help an architect friend with a cost-effective smart home system, he quickly uncovered a market filled with high-priced options. Undeterred, he crafted a custom solution—an idea that sparked demand far beyond that first project and launched G6 Super Homes.

Our journey has been organic and driven by delighted customers spreading the word. Over 1,000 super homes later, we're proud to be leading a new era in smart automation, one that's accessible, cutting-edge, and ready for the world.

With an in-house R&D and manufacturing team, we ensure satisfaction and quality at every touchpoint. At G6, we don't just build smart homes; we create homes that feel designed exclusively for you.

At G6, we believe in transforming your home into a "Superhome".
